Introduction

This issue of Fire Losses in Ontario combines the 1979 and 1980 loss statistics under one cover. A number of categories have been eliminated for reasons of redundancy, non-relevance or failure of compliance with the new computer processing system.

This slightly abbreviated and combined edition will serve to both introduce you to an adjusted format and set the stage for the 1981 edition which promises to contain many new pertinent categories in a format which should produce expanded information in a more readily comprehensible context.

Part of this new format appears in this edition, in that for the first time, the fire loss summary includes the category "firefighters" and the fire incidents and totals listed by county. The county listings also introduce the new numerical code which replaces the Alpha code of previous years. The reason for this change is that it enables us to retrieve information much faster and easier. This system is based on the Federal Government code which utilizes seven digits. However, only four digits are needed for coding purposes in this publicaiton.

The first two digits indicate the County, Regional Municipality and District. The last two digits represent the incorporated municipality.

For example "20" is the code for Metropolitan Toronto and "04" is the code for Toronto City. Discrepancies in section totals in this publication are due to a variance in the time periods of computer runs.

We hope you will appreciate that this edition brings you up-to-date on important statistics for 1979 and 1980 while work is underway on the 1981 edition which will contain major changes designed to give you a wealth of new information.
